Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- I. Drawn to Figure 1
- II. Drawn to Figure 2
- III. Drawn to Figure 3
- IV. Drawn to Figure 4

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Art Unit: 3617

Claims 17-18 and 20 correspond to species I and III. Claims 17-18, 20, and 22 correspond to species II. Claim 19 corresponds to species IV.

The following claim(s) are generic: 12-16 and 21.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Each embodiment includes physical structure not present in the other embodiments. For example, species II includes a three-way valve structure all of the other species lack. Species III includes a fluid reservoir that also functions as a run-flat device, which would include a search not required by the other species. Species IV includes a completely different type of communication system than the other species. Therefore, each species of the invention are considered to be separate inventions that lack corresponding special technical features.

4. A telephone call was made to Mr. Benoit Castel on 9 February 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason R. Bellinger whose telephone number is 571-272-6680. The examiner can normally be reached on Mon - Thurs (9:00-4:00).
